The **Annual Percentage Rate** for all variable rate Sub-Accounts is based upon movements of the prime lending rate published in the Wall Street Journal. I understand the Wall Street Journal's "prime lending rate" is a reference used by banks in determining interest rates on certain loans and is not necessarily intended to be the lowest rate of interest charged on any extension of credit to any customer. The **Annual Percentage Rate** for each month will equal the Index rate on the last day of the preceding month, plus a certain margin, depending upon the Sub-Account. However, the **Annual Percentage Rate** for each Sub-Account will not decrease or increase beyond certain minimum and maximum rates. The margins, as well as the minimum/maximum **Annual Percentage Rates**, for each variable rate Sub-Account are as set forth above. Your Finance Charge for every \$1.00 in your daily balance as well as the number of your monthly payments will increase if the Index rate rises and will decrease if the Index falls.

\*Share Secured loans have a variable interest rate based on the rate paid on the most current \$25,000 share dividend and the loan (index) plus a margin of 3%.

Your **Annual Percentage Rate** will change on the first day of the month following a change in the Index Rate. The effect of an increase in the **Annual Percentage Rate** will be more payments of the same amount.
